## **DETAILED ACTION**

### ***Status of the Application***

Claims 17-33 are pending.

### ***Election/Restrictions***

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 17-30 and 32, drawn to a method for producing hydroxylated and/or acetylated steroids with yeast transformed to express the Cyp7b gene and a yeast cell transformed to express the Cyp7b gene.

Group II, claim(s) 31, drawn to a yeast strain having zero 17-dehydrogenase activity by inactivation of the yil124w gene.

Group III, claim(s) 33, drawn to a method for preparing a medicinal product comprising the step of preparing a steroid, wherein said steroid is produced with yeast transformed to express the Cyp7b gene.

2. The inventions listed as Groups I-III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

3. According to PCT Rule 13.2, unity of invention exist only when there is a shared same or corresponding technical feature among the claimed inventions. The methods of Group I or III and the yeast strain of Group II do not share the same or corresponding technical feature since the yeast strain of Group II is not required for the methods of Group I or III. The yeast strain of Group II is not required to express the Cyp7b gene. Furthermore, the method of Group III is neither a method of use or manufacture of the yeast strain of Group II.

Art Unit: 1652

4. The methods of Groups I and III do not have unity of invention since Group I already contains a product (i.e. yeast strain which expresses the Cyp7b gene) and one method of use and 37 CFR 1.475 does not provide for the inclusion of multiple methods within the main invention.

5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement can be traversed (37 CFR 1.143).

6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

7. Certain papers related to this application may be submitted to Art Unit 1652 by facsimile transmission. The FAX number is (703) 308-4556. The faxing of such papers must conform with the notices published in the Official Gazette, 1156 OG 61 (November 16, 1993) and 1157 OG 94 (December 28, 1993) (see 37 CFR 1.6(d)). NOTE: If Applicant submits a paper by FAX, the original copy should be retained by Applicant or Applicant's representative. NO DUPLICATE COPIES SHOULD BE SUBMITTED, so as to avoid the processing of duplicate papers in the Office.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Delia M. Ramirez whose telephone number is (703) 306-0288. The examiner can normally be reached on Monday-Friday from 8:30 AM to 5:00 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Dr. Ponnathapura Achutamurthy can be reached on (703) 308-3804. Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (703) 308-0196.
